

Press information - **raumplus** A new storage dimension

PERFECT LIAISON

raumplus sliding doors and dividing walls have finally found their equally perfect counterpart: CORNICE.

With its innovative materials and assembly techniques the developed space organising system demonstrates that an attractive exterior can, in fact, be paired with a clever interior. Smart storage.

CORNICE (Italian: "frame") is the top-end interior system by **raumplus** and takes "storage" to a new dimension. It consists of a variable height aluminium frame construction which can be fitted with a range of storage modules and special light-weight shelves, rotating frames and roller shelves, depending on the user's wishes and the usage. Additional options for CORNICE, developed by Burkhard Hess and Gerhard Bernhold, include a visually attractive back wall and a plinth for the entire shelving system.

The combination of innovative technology and cutting edge materials makes it possible to offer "widescreen" solutions. Ultra-light laminated veneer shelves can span widths of up to 200cm without the usual divisions being required.

A heavy-duty, extra-long clothing rail can also hold its own, putting clothing within easy reach and sight. Thanks to the materials the system also looks light. The welded aluminium extrusion profile frame appears very slim when seen from the front, ensuring that even extra-wide shelves do not seem compact or massive.

The lightweight shelves are mounted on almost invisible brackets located within the system and can be installed wherever the user wants them. Integrated chests of drawers which can be variably positioned and are available in two heights (58 and 83 cm) and three widths (49, 72, 95 cm) offer well-organised options for small items while also removing them from direct sight. CORNICE also includes a specially developed revolving frame to take advantage of the storage potential of corners, which is often wasted. It has additional shelves on the back of its mirror, making sure that space is used both effectively and also attractively.

The system's timeless modern look is underlined by the material mix in sophisticated white and grey tones. The frames and clothing rails in standard aluminium; chrome-plated wall mounts and baseboards plus guide profiles and clothing rail mouldings in anthracite plastic provide the discreet backdrop for the white drawer elements. The shelves can, optionally, be used to provide a contrast – a range of surfaces are available.

CORNICE is a perfect fit for all room dimensions; closets and alcoves and is manufactured as a unique solution based on special measurements. The system is simple to assemble; can be installed by two people and, if required, also dismantled and moved to a new location. A clever interior is, in the final instance, also characterised by the fact that it doesn't have to be complicated. Inner values à la **raumplus**.

Prices for the interior system are available on request.

Should you publish this article we would be grateful if you could name **raumplus** as the manufacturer.
