raumplus sliding closet doors with TV integration

How about a system which integrates sliding wardrobes and TV screen/computer monitor? German sliding systems specialist raumplus offers an innovative solution for such a need.

The Sliding TV Door solution from raumplus allows for the closet door/room divider to be used as a TV or computer monitor. In an era where work and leisure spaces are being re-defined, this solution addresses the design and functionality needs of the wardrobes market.

The Sliding TV Door from raumplus not only frees-up the TV screen space from the room walls, but also gives the wardrobe space a distinct look. It is a simple and effective solution and comes with an undertone of minimalistic design language.

The Sliding TV Door allows a monitor with a screen size of a maximum of 55 inches and a weight of 25kg. Smaller screen sizes can also be integrated into this system. The only requirement is that the door height is between 135 and 275 cm and the width between 90 and 150 cm (which is the equivalent size for a 55-inch screen).

raumplus offers various surface and colour options for the sliding door profiles and panels. This further adds to the design language of the interiors. High-performance, compact Bluetooth speakers take the place of a stereo system, while flat-screen TVs blend into media units when not in use.

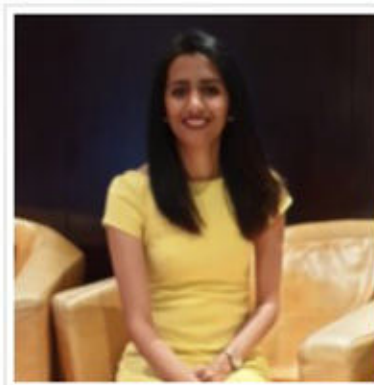

The highlight of the custom-made Sliding TV Door is that it makes the technology invisible when it is not in use. And when in use, it makes the solution the centre of attraction.

Product Description Brand Info Product Enquiry
